## Power Climber Introduces PowerRigging Solutions

SEATTLE – Power Climber, a division of SafeWorks, LLC, has launched a complete line of suspended access PowerRigging solutions for a wide range of structures and applications.

The new outriggers, hooks, clamps, and steel tank devices have endured rigorous product development, engineering, and approval processes and have been thoroughly tested to Scaffolding, Shoring, and Forming Institute (SSFI) national standards. Backed by over forty years of industry experience, Power Climber’s new rigging solutions provide safe, reliable access for various jobsite applications at height.

From portable outrigger beams, gantry stands, and max reach assemblies to parapet clamps, pigeon hole stands, ring girder rollers, and more, Power Climber’s PowerRigging solutions have been designed with ease of transportation and set-up and maximum versatility and code-compliance in mind.

“For forty years, Power Climber has been designing and manufacturing the highest quality traction hoists and modular platforms in the industry, including the recently launched PowerMod Knockdown Platform,” commented Mike Russell, National Sales Director. “It was only natural to compliment our main product offering with a full line of safe, smart, cost-effective PowerRigging solutions, maximizing the safety and productivity of those using Power Climber access solutions for work at height.”
