

SafeWorks Earns ISO 9001 Certification

July 14, 2011

SEATTLE/BRUSSELS – SafeWorks, LLC announced today that it has received ISO 9001:2008 certification for its Seattle production facility. The formal certification reflects SafeWorks’ commitment to its rigorous quality management system, continuous process improvement and to the delivery of the highest level of quality and customer satisfaction.

ISO 9001:2008 certification is granted to organizations that adhere to international standards for quality management that ensure the organization fulfills and achieves continual improvement of its performance in pursuit of the customers’ requirements, applicable regulatory requirements and enhancement of customer satisfaction.

SafeWorks manufactures hundreds of different access equipment solutions at various stages of maturity: everything from new product development to products that have been manufactured consistently for over 60 years. With production consumed to end-markets ranging from wind energy, infrastructure, petrochemical, utilities, military and commercial construction, ensuring quality, consistency, and predictability of output across all product lines is critical to our customers’ operations.

“Earning ISO 9001 certification of our quality management system affirms the sustained effort we have invested in building robust quality systems to create better, safer products so our customers have a more reliable experience working at height,” states Mike Moritz, Vice President Supply Chain. “Having performed well through extensive supplier quality audits with our Fortune 100 clients, this independent verification of our processes confirms the quality our customers have long recognized in our Spider, Power Climber and Power Climber Wind branded products.”
