# Digital Photography

If your shop does not have a digital camera, it may make sense to include this cost in your next year's budget. The cost of this technology has come down in price significantly since original introduction. The cameras have become easier to operate and have more features.

Digital cameras can also help you compile a scrapbook of jobs that your company has done. Share this with your customers and they will gain a new appreciation of the skills your company has. You may see more phone calls because of your jobsite scrapbooks.
