Power Climber Launches New & Improved PC3 Hoist

SEATTLE – Power Climber, a division of SafeWorks, LLC, announces its new and improved PC3 – safer, smarter, stronger traction hoist.

With unique features and customer-inspired improvements, the new PC3 hoists are made in the USA in Power Climber’s ISO 9001:2008 certified facility and boast UL® and CUL® classification. Electrical issues are solved in less than five minutes by simply changing the motherboard, and annual service takes less than one hour, lowering the total cost of ownership.

This improved PC3 is designed to improve the customer’s bottom line, bringing the most durable and best performing traction hoist to the market:

- Easier to operate
- Longer service life
- Lowest annual service cost
- Lowest cost to inventory parts
- Fewer voltage problems
- Lowest probability for rope jams
- Easy to troubleshoot and fix most problems
- Longer service life between replacement parts

“After nearly a decade in the market, we have improved the PC3’s design and features based specifically on our customers’ valuable feedback, offering a product that is now better than ever,” commented Mike Russell, National Sales Director.
